a window
designed to
surprise

DESIGN

With the same surface area of a traditional window, INVISIO is the perfect solution to enjoy natural light at best. The concealed frame makes it possible to create large glass windows where the glass is all that can be seen from the outside. Thanks to the wide range of finishes, RAL colours, wood and oxidized effects, INVISIO can be adapted to meet the most diverse interior design requirements, while guaranteeing elegance and attention to detail on the outside of the building.

STANDARD FEATURES AND SOLUTIONS

AURORA HANDLE

The available options include the traditional Martellina handle and the EXENS model, the innovative handle with no back plate. Both solutions combine functionality and aesthetics thanks to the simple, yet elegant profiles of the Aurora line.

SECRET

Secret hidden hinge for leaf and tilt&turn leaf with 180° rotation capability allowing the window to be opened fully. Each leaf has a capacity of up to 150 kg.

PERFORMANCE

The thermal break in the window ensures excellent thermal insulation and effective noise reduction making it the perfect solution for improving the quality of indoor living.

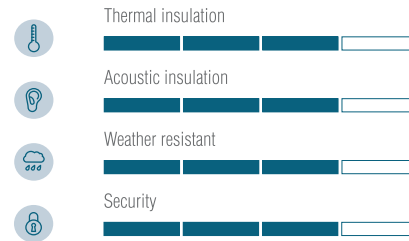

DRAINAGE CAP

Maximum attention to detail is ensured with the inclusion of an aluminium cap, which matches the colour of the window frame and covers the external holes used to drain water and condensation.

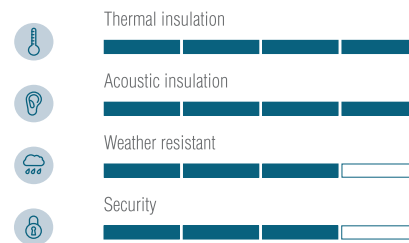

INVISIO is a concealed leaf casement window. Its thoughtful design makes it perfect for those seeking a solution in which elegance and functionality are perfectly combined. Looking from the outside, the glass is all that you can see.

SLIDING
SYSTEM

INVISIO-S

Watch the video

The INVISIO-S sliding window has a hidden leaf, concealed sill and a central section of only 30 mm. It offers extraordinary transparency and luminosity as well as exclusive panoramic views that you can enjoy from your home

unique spaces
impossible to experience before now

DESIGN

INVISIO-S makes a real difference thanks to its hidden leaf, floor-flush sill and central section of only 30 mm, while its modern frame makes it possible to enjoy maximum luminosity. Available in a wide range of RAL colours, wood finishes and oxidised effects, it can be easily adapted to suit any interior design style.

1

STANDARD FEATURES AND SOLUTIONS

INTEGRATED HANDLE

The handle is integrated into the window and the aluminium section is used as a handgrip.

HIDDEN SILL

The sill remains invisible thanks to the floor-flush solution, eliminating all architectural barriers and providing maximum access to the space.

LARGE SIZE WINDOWS

The stainless-steel carriages with a 500 kg capacity make it possible to install impressively large windows of up to 4m in height.

2

PERFORMANCE

The thermal break in the window ensures excellent thermal insulation making it the perfect solution for improving the quality of indoor living and to protect against extreme temperatures in summer and winter.

3

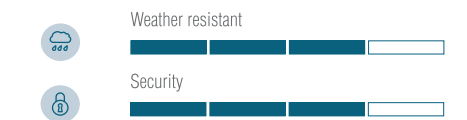

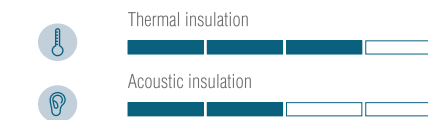

Thanks to the concealed leaf, the floor-flush sill and the 30mm central section, it is perfect for windows that lead on to external areas, such as gardens or terraces, making it possible to enjoy a more delightful space and view.

Parapets can be completely made of glass to enhance the transparency and continuity between interior and exterior spaces. Total Glass eliminates the frame with an extraordinarily elegant result.

NO MORE IN-OUT BARRIERS

INVISIO-S is a high-tech sliding window that guarantees maximum transparency and visibility. Beauty without barriers.

INVISIO-S

The sliding system with discreet fittings leaves more space for large windows. The clean, elegant lines are perfectly in tune with modern tastes, which favour luminosity and subtle elegance.
